Alaska Power and Telephone Company; Notice of Intent To Prepare an Environmental Assessment and Conduct Public Scoping Meetings and a Site Visit

June 25, 1998.

The Federal Energy Regulatory Commission (Commission) has received an application from the Alaska Power and Telephone Company (AP&T) to license the Wolf Lake Hydroelectric Project, Project No. 11508-001. The proposed 2.2-megawatt project would be located on the east side of Prince of Wales Island along Twelvemile Arm, near Hollis, Alaska.

The Commission intends to prepare an Environmental Assessment (EA) for the project in accordance with the National Environmental Policy Act. In the EA, we will objectively analyze both site-specific and cumulative environmental impacts of the project, and reasonable alternatives as proposed by AP&T, as well as, economic and engineering impacts.

The draft EA will be issued and circulated to those on the mailing lists for this project. All comments filed on the draft EA will be analyzed by the staff and considered in a final EA. The staff's conclusions and recommendations presented in the final EA will then be presented to the Commission to assist in making a licensing decision.

Scoping

At this time, we are asking agencies, native Alaskans, non-governmental organizations, and individuals to help us identify the scope of environmental issues that should be analyzed in the EA, and to provide us with information that may be useful in preparing the EA.

To help focus comments on the environmental issues, a scoping document outlining subject areas to be addressed in the EA will soon be mailed to those on the mailing list for the project. Those not on the mailing list may request a copy of the scoping document from the project coordinator, whose telephone number is listed below. Copies of the scoping document will also be available at the scoping meetings.

Scoping Meetings

Two scoping meetings will be held to hear comments on the project that could assist FERC staff in identifying the
